

### Flexible Installation

ClearVue™ Mini is compact – only 3-1/2" x 2" x 3". It fits almost anywhere including inside a line set cover, inside the wall cassette unit (on some cassette models), and easily installs in the ceiling or behind a wall. ClearVue™ Mini features suction lift of up to 6.5'.

### Built-in Overflow Switch

ClearVue™ Mini also include a built-in overflow switch that shuts down the compressor in case of clogged line. This prevents damage to equipment or the environment.

### Rubber Mounting Pad

The molded rubber mounting pad lets ClearVue™ Mini mount to vertical or horizontal surfaces, or to copper refrigerant lines with cable ties. The rubber pad also decreases sound and vibration for quiet operation.

### Multiple Voltages

ClearVue™ Mini can be powered with any voltage from 120 to 240V, 50 or 60 Hz. With one product suitable for multiple voltages, there is no need to stock separate SKUs for different voltages.

### 2 Year Warranty

ClearVue™ Mini has a dependable, extended 2 year warranty.

## About DiversiTech

DiversiTech Corporation is North America's largest manufacturer of equipment pads and a leading manufacturer and supplier of components and related products for the heating, ventilating, air conditioning, and refrigeration (HVACR) industry.

Headquartered in the Atlanta, GA metropolitan area, DiversiTech manufactures a suite of products which includes a wide range of mechanical, electrical, chemical, and structural parts for HVACR and electrical systems, and swimming pool installations. The company maintains manufacturing and distribution facilities in key U.S. locations, Europe, and in the Far East. DiversiTech has enjoyed a continued history of successful growth and has acquired industry-recognized names including Devco® Enterprises, Wagner® Manufacturing, The Black Pad®, Hef-T-Pad™ and Specialty Chemical.

## CLEARVUE™ MINI PUMP

LIT-FLY-CVMINI, 2/13

**C**learVue™ Mini is the newest innovation in ductless system pumps from DiversiTech. It's small, quiet and offers a host of unique features that help it outperform other mini-split pumps. Its whisper quiet operation makes it ideal for installing in and around living areas. And its small size allows ClearVue™ Mini to be installed almost anywhere including inside many cassette units or inside a line set cover system.

Just like the original ClearVue™ and ClearVueKübe™ pumps, ClearVue™ Mini features variable speed and lift and Floatless Sensor™ technology that help the pump think and respond to changing conditions. ClearVue™ Mini adjusts its speed and lift based on how much condensate is being produced, helping it operate more efficiently and with less noise. And with no mechanical float to foul or get stuck, ClearVue™ Mini is ultra reliable. **No float, no problems!**

## FLOATLESS SENSOR™

### Variable Speed and Lift

ClearVue™ Mini determines how fast condensate is entering the tank and adjusts its speed and lift to match the conditions and keep the tank clear.

### Floatless Sensor™ Technology

**No float, no problem!** ClearVue™ Mini's Floatless Sensor™ eliminates many of the typical problems associated with conventional condensate pumps. By eliminating the float, ClearVue™ Mini won't fail like conventional float-switch pumps.

ClearVue™ Mini uses Floatless Sensor™ technology in different levels in the tank to provide the most accurate water level information to the pump's brain. And better information means a better pump. ClearVue™ Mini's Floatless Sensor™ technology tells it how high the water is in the tank and how fast the inflow is. ClearVue™ Mini then uses this information to adjust its pump speed and lift to keep the tank clear and the system running properly.

### Super Quiet Operation

ClearVue™ Mini is nearly inaudible. You literally can hardly hear the pump run. This quiet operation allows maximum installation flexibility, as you can place the pump right in the room where people are.

### LED Lights

ClearVue™ Mini features three LED indicator lights: Power, Run and Alarm. The LED lights tell you what mode the pump is in at any given time.

### Separate Tank

ClearVue™ Mini features a separate tank that can be located away from pump if needed, providing a more flexible installation. This small tank fits inside most indoor cassettes.

### Aluminum Pump Housing

ClearVue™ Mini features an aluminum housing that is built to last. This tough housing protects the pump from physical damage and contributes to the super quiet operation of the pump.

**NO FLOAT, NO PROBLEMS**
