TECHNICAL DATA SHEET

CP Series Condensate Pumps

Purpose
This product is designed to automatically pump condensate produced by air conditioners and de-humidifiers up to 22' vertically once the level of condensate in the tank reaches a specified level.

Advantages
DiversiTech CP-22 series pumps beat the industry standard of 20' lift height by 2 feet and come with innovative features such as: vibration dampening feet and motor mounts, metal hang tabs, four inlet holes (and 3 poly covers for the unused), LED indicators, float switch and duckbill-style check valve, plug protector, and detailed installation instructions. Two terminals are provided allowing the installer flexibility to connect air-handler shut-down - an important safety consideration. CP-22 is available with 20' of 3/8” tubing as well.

Utilizing the same great features but in a low-height (4-3/8”) design, the CP-22LP is great for tight spaces.

If a smaller job is in order, the CP-16 is an economical alternative that’s based off of the proven CP-22 design. More compact than the CP-22, it’s designed to lift to a maximum of 16 feet. The CP-16 shares many of the great features of the CP-22, including hang tabs, four inlet holes, float switch, overflow switch, and a check valve.
