

DiversiTech Air Conditioner Mounting Brackets - 36"

Installation Instructions - Professional Installation Required

1. Ensure that the wall the mounting bracket will be installed on is capable of supporting the weight of the air-conditioner condenser and bracket.
2. Use the correct size mounting bracket to match up with the condenser unit size. Allow a minimum of 6 inches or manufacturer's recommendation between the condenser unit and the wall.
3. Use the holes in the mounting brackets as required to mount the bracket to the wall. Use appropriate hardware for the wall type to fasten the condenser unit and the mounting bracket to reduce noise and vibration.
4. Install DiversiTech anti-vibration pads (not included) between the condenser unit and the mounting brackets.

Air Conditioner Mounting Brackets

- 36 inches
- Use to support A/C Condensers and Heat Pumps
- 12 gauge steel holds up to 600 lbs. dependant on wall & hardware
- Pre-punched holes allow easy attachment to wall and unit
