SpeediClip™ – fastest
SpeediChannel™
installation.*

DiversiTech SpeediChannel™ is an innovative channel system used to cover air conditioning line sets. The two part system has a base and a cover. The base is fastened to a wall or ceiling, then a clever little plastic clip (SpeediClip™) snaps into a channel already molded into the base. Then, using standard cable ties, the line set, cables, control wires, and condensate drain line are fastened in place. The cover then snaps simply on top of the base.

The SpeediChannel™ system is available in three widths – 3", 4", and 6". Each piece of Speedi-Channel™ is 6-1/2 feet long. A complete line of couplings, elbows, and tees are available for the SpeediChannel™ system.

Manufactured from rigid PVC, the Speedi-Channel™ system is a natural color that is a very close match to the typical mini split condensing unit case. However, the Speedi-Channel™ system can be painted as desired to match any wall color. The PVC used in the SpeediChannel™

system is resistant to UV light, and is UL rated.

DiversiTech recommends attaching the base to the wall or ceiling and the line sets to the system every 15" to allow for the system to carry the full weight of the line sets.

SpeediChannel™ can also be used inside.
